Subject: RE: Call Yesterday and Follow-up

Hi Carson,

It would probably also be good to involve Scott Wilder, the technical enforcement specialist, and potentially his boss, Kelcey Land. I'm the attorney for the site assessment group, so if I could stay in the loop as well, it would be great. Rob is probably the key though, he can elaborate on where the site is on the site assessment group's radar.

Thanks!

ap

Joe & Amelia –

Do you know who all would need/want to participate in a follow-up discussion on CFAC? From the meeting yesterday, it sounds like we would need Rob, but I'm not sure who else.

Thanks,
CC

Subject: Call Yesterday and Follow-up

Carson, Thanks much for organizing EPA folks for the call yesterday on M2Green MPDES permit. I think it was very productive conversation that will facilitate timely action on the permit. Please thank all the call participants on the DEQ MPDES permitting program's behalf.

On another note -- We have some related but slightly dissimilar issue with the MDPES permit for Columbia Falls Aluminum, which is also on a short time frame for permit action by DEQ. Is there any chance we could get a couple folks organized that are familiar with the site and issues (and have programmatic regulatory interest in the facility) to discuss this site through the MPDES lens. Middle of next week would be optimal.

Thanks again for the support and dialogue yesterday and thanks in advance for the conversation on CFAC.
